Training Statement

Duke University Counseling and Psychological Services (CAPS) offers an APA accredited 2000-hour internship in Health Service Psychology. This training occurs within an interdisciplinary agency of psychologists, clinical social workers and psychiatrists and an interprofessional working environment with health and wellness professionals from Student Health, Student Wellness Center and Duke Reach (case management).

The health service psychologist model is well suited to training and service delivery for emerging adults within a higher education context. Holistic health and wellness promotion and treatment of mental health disorders occur within an integrative emerging adult developmental framework. At CAPS, biopsychosocial assessment, intervention and consultation are provided for undergraduate, graduate and professional students, faculty, staff, parents and families. Considerations of micro and macrolevel aspects of diversity are paramount for trainees, professionals and service users within the collegiate context. Advances in psychiatry and clinical social work supplement the training experience.

Practice, research and scholarship form a symbiotic relationship, with opportunities for continuous feedback and enhancement of services and knowledge. An emphasis on scholarship and research facilitates an appreciation of multiple pedagogies and interdisciplinary knowledge streams. Historical and traditional psychological evidence-based research and theoretical models are simultaneously upheld and decentered. Interns are supported in developing the skills to become active consumers of clinical research and practice. They are encouraged to maintain a stance of curiosity and reflectiveness while they critically evaluate applications across contexts. Finally, the primacy of personal and professional growth within a health and wellness model is consistent with the goals of CAPS and Student Affairs.

The training experience is service-oriented and individually tailored to provide a broad range of learning opportunities focused on the diverse emerging adult and adult populations within the higher education context. These include: clinical and developmentally focused individual and group psychotherapy and counseling; career and personality assessment; career counseling and developmental programming; mental health consultation for students, families, academic faculty and administration and student support units; multidisciplinary treatment collaboration and referral; diversity apprenticeships; and outreach and community engagement.

Modalities of clinical intervention include individual, couple and group therapy and developmental programming. Community level interventions include mental health
consultation, outreach, and community engagement. Each intern has the opportunity to participate in the development and leadership of developmental programming, with practice activities that assist students in areas such as career and life planning, interpersonal communication, health and wellness, diversity and identity development, and stress management.

Clinical and counseling psychologists, clinical social workers and psychiatrists work together to meet the training needs of psychology interns in a broad range of activities. These activities are relevant to the practice of psychology in the university counseling/mental health setting and other psychological service agencies. Supervision, training seminars, clinical teams, diversity apprenticeships, colloquia, research time, and professional development balance service activities.

The internship year is coordinated and supervised by licensed psychologists.

Training Mission

The Counseling and Psychological Services (CAPS) doctoral psychology internship offers training for the practice of health service psychology with the emerging adult population within the context of college student mental health. This training occurs within an agency setting that values individual and cultural diversity.

Training Goals

1. To foster the intern’s professional identity as a health service psychologist including preparing the intern for rapid entry into a professional work setting.
2. To develop the intern’s assessment, individual, group, developmental programming, consultation and crisis intervention capabilities with the mental health and psychological difficulties of service users.
3. To develop the intern’s skills in outreach, interdepartmental collaboration and community engagement.
4. To increase the intern’s awareness and knowledge of cultural and individual differences and diversity at the micro and macrolevels of intervention.
5. To increase the intern’s awareness and knowledge of the ethical principles of psychologists and how these principles are applied in a service setting.
Duke University

Duke University is a privately supported university with an enrollment of 14,950 students who come from 50 states and 94 foreign countries. The University provides a stimulating learning environment in its nine colleges and schools: Trinity College of Arts and Sciences, School of Law, Divinity School, Graduate School, School of Medicine, School of Nursing, Nicholas School of the Environment and Earth Sciences, Pratt School of Engineering, and Fuqua School of Business. The University, with its national and international reputation for academic excellence, is located in Durham, North Carolina (pop. 292,191). It is situated amidst the 7,000-acre Duke Forest and in close proximity to North Carolina Central University (Durham), North Carolina State University (Raleigh) and the University of North Carolina (Chapel Hill). The four major universities provide a vibrant atmosphere for cultural, educational, athletic and student life. They are located adjacent to the Research Triangle Park, one of the largest planned research parks in the United States. The universities collaborate with organizations there in many research and service endeavors.

The undergraduate (2014-15) student population of 6,485 is remarkable for its diversity. African Americans comprise 10% of the student population. Asian Americans comprise 22%, Hispanic/Latino, 7%, Caucasian, 46% and International, 10%. The graduate and professional student population is 8,465 students with a total enrollment of 14,950. The gender ratio for the undergraduate population is female identified 49%, male identified 51% and 15% of the undergraduate students are North Carolina residents. Duke has a need-blind admission policy and approximately 50% of undergraduates receive financial assistance. The university registrar does not collect percentages of the student population that identify as LGBTQ.
Counseling and Psychological Services (CAPS)

CAPS evolved in 1977 with the merging of the existing Counseling Service and the Student Mental Health Service. University administrators believed that the most effective way to meet the broad needs of the student population would be through the close collaboration of mental health professionals of various disciplines. Some CAPS professional staff maintain clinical faculty appointments in the Department of Psychiatry and Behavioral Sciences, Duke University Medical Center.

CAPS is an agency within the Division of Student Affairs. The mission of the Division of Student Affairs is to support the optimal growth and development of our students and to provide services and support that will enhance their intellectual, social, cultural and physical development.

The mission of Counseling and Psychological Services is to enhance the education of Duke University students by addressing their mental health concerns and promoting their healthy emotional and social development.

The challenges of college life are great and demand a variety of personal strengths and problem-solving skills. CAPS is available to help students enhance their strengths and develop their abilities to deal with the experiences of living, growing, and learning at Duke. CAPS fills this need by providing a comprehensive range of psychological and psychiatric services. They are designed to intervene in and prevent emotional and psychological difficulties and to strengthen students’ abilities to succeed in the University’s undergraduate, graduate, professional and allied health programs.

These services include brief individual and group psychotherapy, crisis intervention, integrative health coaching, referral, emergency response, psychiatric services, career counseling and assessment, consultation, outreach and developmental programming and community engagement interventions.
Training Staff

**Anita-Yvonne (AY) Bryant, PhD**
AY completed her PhD in Clinical/Community Psychology at the University of Maryland, College Park. She completed her internship training at Counseling and Consultation Service at The Ohio State University. AY serves as the Associate Director for Training Programs and Multicultural Services Liaison. She is a Clinical Associate in the Department of Psychiatry and Behavioral Sciences and an Integrative Health Coach. AY’s professional interests include: multicultural counseling and training which encompasses culture, gender, sexual orientation and other aspects of diversity; the psychology of African American women; program development and evaluation; and community level consultation and outreach. Clinical interests include understanding the impact of environmental oppression and spirituality in the healing process. Current research interests focus on academic performance and collegiate experiences. Her counseling style reflects an African-centered multicultural philosophy, which integrates transpersonal, narrative and cognitive approaches in therapy. She is a member of the American Psychological Association, the Association of Black Psychologists and the board of the Association of Counseling Center Training Agencies.

**Robin A. Buhrke, PhD**
Robin completed her PhD in Counseling Psychology from Southern Illinois University at Carbondale with an internship at the University of Maine at Orono Counseling Center. She is licensed to practice psychology in North Carolina. She spent the 1997-98 year working on Capitol Hill as the American Psychological Association William A. Bailey Congressional Fellow. Her interests include psychology and public policy, diversity and multicultural issues, and sexual orientation issues. Robin is Associate Director of Research and Technology and Lesbian, Gay and Bisexual Services Liaison. She serves on the Duke University Task Force on Lesbian, Gay, and Bisexual Issues; is a Fellow of the American Psychological Association and member of Divisions 17, 19, 44 and 45; is Past Chair of APA’s Committee on Lesbian, Gay, and Bisexual Concerns; is past President and Fellow of APA’s Division 44: The Society for the Psychological Study of Lesbian and Gay Issues, and is past-chair of APA’s Committee on Women in Psychology. She currently sits on APA’s Division 19/44 Task Force on Sexual Orientation and Military Service.
Tara Chandrasekhar, MD
Tara Chandrasekhar is the newest staff psychiatrist at CAPS. She received her medical degree from the University of Missouri-Columbia. She completed residency training in General Psychiatry and Child and Adolescent Psychiatry at the University of North Carolina-Chapel Hill. Prior to joining Duke, she was a Clinical Assistant Professor with the UNC Department of Psychiatry. Currently she has an appointment as a Medical Instructor in the Department of Psychiatry and Behavioral Sciences at Duke University. In addition to her work at CAPS, Dr. Chandrasekhar provides psychiatric evaluations and medication management to those with Autism spectrum disorders. She has a research interest in novel treatments for Autism spectrum disorders and participates in clinical research at the Duke Center for Autism and Brain Development.

Ayesha K. Chaudhary, MD
Ayesha received her medical training at The Aga Khan University Medical College in Pakistan and specialized in general adult psychiatry during her residency at Duke University Medical Center. She completed a clinical psychopharmacology preceptorship through Duke Glaxo Welcome and served as Executive Chief Resident during her time at Duke Medical Center.

She is a Diplomate of the American Board of Psychiatry & Neurology and a member of the American Psychiatric Association. She is a Clinical Associate in the Department of Psychiatry and Behavioral Sciences at Duke. Her clinical experience is broad based, and she has a special interest in chronic psychiatric illness and cross-cultural issues.

Jennie Dickson-Mills, MSW, LCSWA, RYT
Jennie completed her Masters in Clinical Social Work at UNC Chapel Hill in 2013 and her clinical internship at Duke University CAPS during the same year. She then completed a two year, post-graduate fellowship at CAPS, and is now a full-time staff member.

Jennie has attended focused professional trainings in brain-based somatic therapies including EMDR and Somatic Experiencing. She is interested in maximizing the body-brain connection for healing by developing inner awareness through mindfulness practices and somatic techniques.

Her professional interests include multicultural counseling, including working with LGBTQ individuals and communities, issues related to gender identity and oppression, the role of spirituality and values in healing, and the impact of environmental oppression on psychological health, especially the impact of racism. She enjoys teaching workshops at CAPS including Koru Mindfulness, Thrive, and One Breath Yoga.
Jennie has been a registered yoga teacher with Yoga Alliance since 2010 and has completed additional trainings in Trauma Sensitive Yoga and Yoga Therapeutics. Jennie is a faculty member at the Center for Koru Mindfulness and assists the Center in training professionals to teach mindfulness to emerging adults across the country.

**Mazella Fuller, PhD, MSW, LCSW, CEDS**
Mazella joined CAPS in September 1995. She received her Doctorate in Human Services from Walden University-Institute for Advanced Studies, and her Master of Social Work from Smith College. Mazella served her internship in the Mental Health Division at University of Massachusetts at Amherst.

Mazella’s professional interests include: brief individual and couples therapy, ethnic and cross-cultural issues, women’s issues, group therapy, supervision and training outreach programs. An additional counseling interest involves her focus on self-esteem issues within a developmental framework. Mazella is a member of the National Association of Social Workers and the Association of Black Social Workers. She is a Clinical Associate in the Department of Psychiatry and Behavioral Sciences, Duke University.

**Lia Gilmore, LCSW**
Liadainn (Lia) Gilmore, LCSW is the Referral Services Coordinator at CAPS. She came to CAPS in 2011 from the Emergency Department at Duke Hospital where she was a clinical social worker and performed urgent psychiatric assessments for children and adults. She earned her MSW in 1992 and since that time has worked in many clinical settings with a significant emphasis on outpatient treatment and community mental health.

In her practice, Lia is particularly interested in psychotherapies that combine mind and body treatment and has studied energy psychology, mindfulness and Reiki. She is a member of NASW. At CAPS, Lia enjoys helping students find the right connection with a community therapist or psychiatric services practitioner.

**Rebecca Hurst, PhD**
Rebecca joined CAPS in August of 2012. She earned her PhD in Counseling Psychology from the University of Oklahoma and completed an internship and post-doctoral residency at University Counseling Services at Virginia Commonwealth University. Her theoretical orientation is primarily informed by relational and multicultural approaches to therapy.

Rebecca’s clinical interests include LGBTQ issues, gender identity and its expression, cultural diversity, group therapy, and working with student-athletes. She enjoys training, clinical supervision, and collaborative efforts to promote community-level change.
Doris Iarovici, MD
Doris completed medical school at Yale University School of Medicine in New Haven, CT. She did her residency training at Duke Medical Center. Doris coordinates the residency elective program. She has worked with students at CAPS since 1996. Professional interests include psychodynamic and relational psychotherapy, cross-cultural issues, and the interface between psychopharmacology and therapy. She is a Clinical Associate in the Department of Psychiatry and Behavioral Sciences, Duke University.

She is a Distinguished Fellow of the American Psychiatric Association and the North Carolina Psychiatric Association. She holds a North Carolina medical license and is Board Certified by the American Board of Psychiatry and Neurology.

Michael (Mike) Iezzi, PhD
Michael has been a staff psychologist at Duke CAPS since 2015. He completed his PhD in Counseling Psychology at New Mexico State University. Michael completed his internship training at the University of Missouri Counseling Center. Prior to joining Duke CAPS, Michael was a staff psychologist at the Texas Tech University Counseling Center.

Mike’s professional and clinical interests include: multiculturalism, men and masculinity, student-athletes, group therapy, couples counseling, outreach, and training. He has a particular interest in White privilege; both in terms of promoting counselor awareness and helping students better understand their cultural identity. His theoretical orientation is emotion-focused therapy infused with a multicultural perspective. He also values an interpersonal process approach, particularly in group therapy. Michael strives to create an egalitarian environment in therapy and supervision.

Jeff Kulley, PhD
Jeff is the Associate Director for Clinical Services. Jeff joined the CAPS staff in May of 2001 as a staff psychologist and Coordinator of Alcohol and Substance Abuse Services. Prior to joining our staff, Jeff worked for seven years as a Staff Psychologist at the Counseling and Mental Health Center of the University of Texas. There he served as Coordinator of Testing Services and Supervisor of Alcohol and Substance Abuse Assessment and Treatment. He also coordinated the Individual Therapy Practicum Training Program, taught practicum students, interns, and post-doctoral staff during his tenure at The University of Texas.

Jeff earned his PhD in Counseling Psychology from the University of Texas at Austin and completed his internship at the Olin E. Teague Veterans Center in Temple, Texas. He also worked for over ten years in the community of Austin as a group facilitator and
trainer for a domestic violence prevention program. His special interests include EMDR and other trauma treatments, risk and threat assessment, legal and ethical issues in college mental health, and clinical systems administration.

**Yan Li, PsyD**

Yan received her doctorate degree from University of Northern Colorado and completed her internship at Miami University. Her theoretical orientation is eclectic, combining Zen Psychology (mindfulness and acceptance), interpersonal, and feminist approaches to treatment. Her clinical interests include mindfulness-based treatment, counseling culturally diverse populations, multilingual counseling (English, Mandarin Chinese, and Cantonese), LGBTQ issues, grief and loss, clinical supervision, and psychology of women.

**Marvice D. Marcus, PhD.**

Marvice is a Psychology Resident and Staff Therapist at CAPS. He earned a Ph.D. in Counseling Psychology from Washington State University and completed his doctoral internship training at Duke University CAPS. He has primarily worked in university mental health across three regions of the United States.

Dr. Marcus enjoys working with students who present with concerns related to adjustment, mood and anxiety disorders, social and familial conflict, and sexual identity and gender expression. He adopts an integrative approach to counseling, drawing on cognitive-behavioral therapy and interpersonal process. Other professional interests include men and masculinities, race and gender politics, and issues of diversity and inclusion. He is especially interested in developing ways to effectively use cultural studies to contextualize human suffering, as well as to elucidate the underpinnings of thought processes and behavior. Dr. Marcus is a member of the American Psychological Association (Division 44) and the Association for Contextual and Behavioral Science.

**Lisa Milliger, PMHNP-BC**

Lisa is an ANCC Board-Certified Psychiatric Mental Health Nurse Practitioner. She joined CAPS in Nov 2016. Lisa received her Master's Degree in Nursing from the University of North Carolina-Chapel Hill and her Bachelor's Degree in Nursing from Duke University. Prior to joining CAPS, she was employed by Duke University Hospital.

Lisa participated in the LEND (Leadership Education in Neurodevelopmental and Related Disabilities) fellowship program at the Carolina Institute for Developmental Disabilities.
Her professional interests include working with young adults in the context of a developmental framework; reducing mental illness-related health disparities, the association between belief structures and health-related behaviors, the biopsychosocial basis of mental health conditions and subsequent interrelated responses, and holistic wellness. She is passionate about access to mental health care for marginalized and underserved populations.

Lisa is a member of the American Nurses Association, the North Carolina Nurses Association, and the American Psychiatric Nurses Association.

**Danielle Oakley, PhD**
Danielle joined Counseling and Psychological Services in 2016 after serving as Director of Counseling and Consultation Services at the University of Wisconsin-Madison for six years. The focus of her work has been creating a “no wrong door” environment in which all members of the campus community know how to recognize, respond, and refer students in distress. She has initiated collaborative care programs between mental health and medical services and addressed the stigma of seeking mental health care by promoting counselors as consultants in areas where students gather. She initiated the creation of a protocol to provide hormone therapy for transgender students and led initiatives that address how racism impacts mental health.

Oakley earned a doctorate in counseling psychology from the University of Kentucky, a master’s in community counseling from Loyola University of Chicago and a bachelor’s degree in psychology from the University of Iowa. She currently serves on the Board for the Association for University and College Counseling Center Directors. She is a member of the American College Health Association and Association for Threat Assessment Professionals.

**Holly B. Rogers, MD**
Holly is a staff psychiatrist at CAPS. She received her medical degree from the University of Texas Southwestern Medical School in Dallas, Texas. She completed her residency in psychiatry at Duke University Medical Center where she served as Executive Chief Resident. She has also completed a Fellowship in Forensic Psychiatry. Currently she is appointed as a Clinical Associate in the Department of Psychiatry and Behavioral Sciences, Duke University Medical Center. She has a special interest in using Mindfulness Meditation to treat a range of stress-related problems and leads a meditation group for Duke students.

Before coming to CAPS, Holly worked as a staff psychiatrist in a community mental
health center in Auckland, New Zealand. She is a member of the North Carolina Psychiatric Association, and the American Academy of Psychiatry and Law. She is a Distinguished Fellow in the American Psychiatric Association.

**Joseph E. Talley, PhD, ABPP**  
Joe is a counseling psychologist and Associate Director and Clinical Professor of Medical Psychology, Department of Psychiatry and Behavioral Sciences, Duke University. Joe’s special interests include the use of imagery, hypnosis, Jungian Psychology, technique in brief and very brief psychotherapy and the interface of spirituality and psychology. He has been the primary author/editor of seven books, most of which are in the field of university student counseling services and psychotherapy.

He is certified as a practitioner and a supervisor/consultant in clinical hypnosis by the American Society of Clinical Hypnosis and has served on its Ethics Committee. Joe is a Fellow of the American Psychological Association, a site-visitor for the American Psychological Association for internship accreditation, and is Chair of the Awards Committee of Division 17 for 2006.

Joe completed his doctorate and did his internship at the University of Virginia. He is Board Certified in Counseling Psychology, ABPP and in Clinical Psychology, ABPP. He is a Fellow and a former President of the American Academy of Counseling Psychology, a Fellow of the American Academy of Clinical Psychology and is currently Special Liaison to Government and Related Professional Groups and a former Chair and Chief Executive Officer of the Council of Presidents of Psychology Specialty Academies of the American Board of Professional Psychology.

**Greg Welikson, PhD**  
Greg completed his Ph.D. in Counseling Psychology at Fordham University and his doctoral internship training at Duke University CAPS. Greg has also received clinical training at City College’s Counseling Center, as well as the Rosemary Furman Counseling Center at Barnard College. Greg is currently a psychology resident on staff.

Greg’s professional and clinical interests include: helping people authentically connect to themselves and others, couples counseling, and the treatment of anxiety and depression through an integrative multicultural, skills based, and relational perspective. Greg is also interested in helping students engage in career and identity exploration, and providing a supportive environment for students experiencing normative stress reactions to discrimination based on their identity. Greg also enjoys working with members of Duke’s IFC Greek Community.
Administrative Staff

Mary Louise Cicinnati
Mary is a Staff Assistant at CAPS. She moved here from Long Island, New York in June 2006, and began at CAPS in March 2007. She has backgrounds in both legal and administrative work. Her responsibilities include assisting the staff in an administrative and creative role, working closely with Outreach Development as well as assisting with front desk operations.

Gwen Lloyd, BSW
Gwen completed her undergraduate degree in social work at East Carolina University in Greenville, NC. She completed her internship training in social work with K-12 children. Gwen is the Administrative and Finance Coordinator for CAPS. She works closely with the Director in oversight of the budget and administrative functions, supervises support staff, handles financial and payroll aspects of the office, and works on special projects as assigned.

Christine Mello, BBA
Christine is a Staff Assistant at CAPS. Christine holds a Bachelor's degree in Business Administration. Most recently she pursued certification in web design and before this spent many years as a project manager, systems analyst and programmer. Her current responsibilities include administrative support for CAPS, front desk reception, and maintaining the referral database.

Kate Sakofsky, BA
Kate is an Administrative Assistant at CAPS. She attended Meredith College in Raleigh, NC and holds a Bachelor's degree in Pre-Art Therapy. Kate came to CAPS in January of 2006. Her responsibilities include overseeing front desk operations, maintaining the Titanium scheduling system and data collection for agency research.

Colette Smith, BS
Colette is a Staff Assistant at CAPS. Colette holds a Bachelor's Degree in Business Management and Organizational Development. She has also been awarded certificates in Customer Service from American Management Association. Her current responsibilities are working with supporting front desk reception, and assisting with the Internship Training Program.

The Facility

CAPS is located on the third floor of the Student Health and Wellness Building. The building along with the West Union, Bryan Center Plaza, Page Auditorium and Penn Pavilion, comprise the Campus Center. CAPS is co-located with Student Health, the Wellness Center, Duke Reach (case management), Nutrition Services and Physical Therapy.

CAPS has three mixed-use group rooms with video recording capabilities and conference room.

Each intern has a separate office, fully equipped with a desk, cabinet and shelf space and a comfortable seating arrangement. All offices are soundproof and carpeted. CAPS maintains a professional library for staff, interns and residents that includes books and journals pertinent to university counseling/psychotherapy and psychology in general. In addition, four libraries (William R. Perkins/Bostock Library, Medical Center Library, Divinity School Library, East Campus-Lilly Library) are within easy access to staff and interns. Combined they maintain over 4,400,000 volumes.

All interns have a Macintosh computer workstation in their offices. It is networked to the other CAPS computers and those within the Division of Student Affairs. Current versions of software available include: Titanium, Microsoft Word, Excel, FileMaker Pro, Adobe InDesign, and PowerPoint. The Internet is accessed via Chrome, Safari or Firefox. An e-mail account is established for each intern. Logitech cameras are available for recording sessions.
The Practice Experience

At the beginning of the first half and second half of the internship year, interns and coordinating supervisors will review the training and practice opportunities available and the amount of time that can be devoted to each. Interns spend an allocated amount of time in all of the areas outlined below; however, the degree of emphasis on each will be flexible and negotiable in order to respond to individual training needs.

Initial Interview Assessment

Interns gain experience doing initial assessments including: Reason(s) for referral, history of the precipitating event, mental status information, risk assessment, relevant family personal and academic developmental history, formulation of a diagnostic impression, and development of an intervention plan.

Case Consultation and Management

Interns meet weekly as a part of a multidisciplinary clinical team where they discuss case consultation, referral information and treatment planning.

Crisis Intervention and Very Brief Psychotherapy

A significant number of students present with emotional crises and are provided crisis intervention and very brief therapy (1-7 sessions). A portion of the intern’s clinical work is directed at working with this client population.

Brief Psychotherapy

Many students seek brief psychotherapy with respect to a central psychological problem. These students are typically seen for about 8-16 sessions (approximately one semester).

Year-Long Psychotherapy

Interns are expected to carry 1-2 cases in open-ended, "long-term" psychotherapy. The duration of intervention is 8-12 months.

Career Counseling

Under the supervision of a CAPS psychologist, interns provide counseling to students in career planning, values and decision-making. Services include assessment of personal style and interests, values clarification, providing information, and skill development in areas such as decision-making and life planning, and navigating graduate and professional school.
**Psychological Assessment**

Interns gain experience in assessment in several ways:

- In addition to the initial assessment interview, interns utilize the CCAPS Questionnaire and a problem checklist to clarify and define the presenting problem(s).

- Vocational counseling assessment is done with the Strong Interest Inventory, Myers-Briggs Type Indicator and the narrative interview.

- With at least two clients per semester presenting with a personal concern, interns will conduct a formal diagnostic comprehensive assessment. This assessment will assist the intern and the client in defining a symptom-focused formulation of the problem appropriate for brief psychotherapy.

**Mental Health Consultation**

Interns gain experience in providing mental health consultation to the university community, parents, families and outside agencies. During the spring and summer, interns will be responsible for two weeks of after-hours coverage.

**Group Therapy**

Each semester, CAPS offers a series of counseling and psychotherapy group experiences. The most common group format is the Understanding Self and Others group. These groups are co-facilitated with a licensed staff member. The internship offers opportunities to design, coordinate and co-lead group interventions during the second half of the internship.

**Developmental Programming**

Developmental programming opportunities are included in the internship. There are opportunities to make presentations and conduct skills based learning for a variety of constituencies. Examples of recent developmental programs include: Koru (mindfulness and meditation), Worrying Well (ACT) and Stress for Success. A hallmark of the developmental programming is the evidence based framework designed to address common anxiety, stress and depression symptoms in the emerging adult population. During the second half of the internship, interns are encouraged to be creative when developing programming both in response to outreach requests and while initiating programming to meet student needs.
**Outreach and Community Engagement**

Interns collaborate with other staff members on outreach requests to numerous departments. Activities include orientation to CAPS services, liaison meetings, mental health consultations, and community crises and interventions.

**Apprenticeships**

Interns will be able to work as apprentices with one or more senior staff members who are engaged in ongoing clinical, consultation and/or programming efforts directed at issues of student development and/or the needs of specific student populations, including women, students of color, international students, and lesbian, gay, bisexual and transgender students. A licensed psychologist supervises the apprenticeship and interns meet periodically as a group to discuss the apprenticeship.

The goal of the apprenticeship is to provide interns with an opportunity to play a longitudinal role in the development of a range of psychological interventions with specific populations. Through this ongoing experience, interns will be able to cultivate skills needed in developing a range of population specific interventions.

**Couples Psychotherapy**

CAPS receives requests from couples seeking therapy regarding relationship concerns. Interns have the opportunity to engage in this modality of psychotherapy. Interns can discuss this with their coordinating supervisors and front desk staff. In this way, couples can be assigned more routinely.

**Professional Development Time**

Beginning in September, four hours on Friday mornings (8:00 a.m.- noon) are allocated as Professional Development Time (PDT). Two hours of professional development is allocated for session review and supervision preparation. Two hours are allocated for the following:

Scholarly Research. To complete work on the dissertation or other graduate competency project.

Independent Study. The intern may choose to work with a senior staff member on an independent study focused on some aspect of psychological treatment/service with college students.
Professional Writing. The intern may choose to work on a research or theoretical paper that may be submitted for publication. It is expected that the PDT be used by interns to strengthen, foster and develop their identity as a psychologist. Interns will present the results of their PDT during a spring colloquium.
Supervision

Supervision is the primary mode through which interns receive their training and socialization into the profession. Falendar and Shafranske (2004) note:

In general terms, supervision monitors and ensures competency in client care and contributes to the education and training of a psychologist. The most important task of the supervisor is to monitor the supervisee’s conduct to ensure that appropriate and ethical professional practices are implemented leading to the best possible clinical outcome for the client. Quality assurance is the primary ethical responsibility of the supervisor and supersedes educative, training, and evaluative functions (p.8).

Coordinating or primary supervisors serve as clinical supervisors, mentors and advocates. They also serve an administrative function and collate evaluation and other materials at mid-point and the end of the internship or residency elective.

Each intern receives four hours of supervision each week. A coordinating supervisor is assigned for the internship year. This person is a licensed psychologist and meets with the intern for a two-hour supervision block each week. The responsibility of the coordinating supervisor is to oversee the intern’s progress during the year. This person serves as a supervisor and also collates evaluations from other supervisors at mid-year and at the conclusion of the internship. In addition, the intern receives an hour of group career supervision from a licensed psychologist.

Because of the multidisciplinary composition of the CAPS staff, the intern may have the opportunity to have one hour of secondary group or individual supervision with a clinical social worker during the academic year or a psychiatric services provider in the summer. To the extent that scheduling permits, at mid-year the intern may select another supervisor in exchange for their second supervisor. Finally, the intern is encouraged to utilize any training staff for consultation any time. Senior staff are very amenable to being approached for assistance.

The principal supervisory mechanism for counseling/psychotherapy is videotape. In addition, the supervisor may directly observe the intern’s work; this opportunity is most notably available in co-leading work with the supervisor.

Training staff have differing theoretical orientations and approaches to supervision. All are guided by a developmental framework and incorporate approaches that are grounded in the discipline of the staff member.
Core Components of Primary/Coordinating Supervision

These are the common components of the coordinating or primary supervision at CAPS:

- The learning contract, outline of supervision goals or supervision agreement. This is a written statement signed by the coordinating supervisor and supervisee.

- Ongoing review of the training experience and case management to maximize wellness and self-care and minimize compromised professional competency.

- Ongoing conversations regarding the range of human diversity and its impact on supervision, developing culturally competent practice and professional development.

- Ongoing discussions of the ethical considerations of supervision and practice.

- A discussion of the purposes of supervision and information regarding the supervisor’s supervisory orientation and approaches.

- An explicit articulation of the expectations, roles and responsibilities of the supervisor and supervisee.

- An overview of the logistics of supervision.

- Ongoing discussion of evaluation, rights and concerns/dispute resolution policies and procedures.

- The use of videotaping as the primary vehicle for assessing clinical quality assurance.
Seminars, Colloquia and Meetings

Training seminars provide a combination of lecture presentation, discussion and application relevant to significant topics in university mental health and emerging adulthood. Seminars occur weekly for two hours. The training seminar is built around a series of modules. The modules and a sampling of topics follow:

- **Clinical Topics**: psychological emergencies, depression and its relationship to suicide, psychotropic medications
- **Ethics**: professional ethics in clinical practice, ethics and supervision, ethical considerations and decision making in professional psychology
- **Brief Interventions**: brief psychotherapy, very brief psychotherapy/crisis intervention, DBT and ACT
- **Cultural Diversity and Special Populations**: multicultural considerations in working with university students; psychotherapy with LGBTQ students, clinical cultural formulations, environmental assessment; psychotherapy with women/men
- **Technical Considerations**: closing in brief psychotherapy, use of self-psychology, use of imagery and early memories, therapeutic strategies with perfectionistic students; Koru mindfulness.
- **Professional Development**: licensure, job search, rhythms of the internship year
- **Supervision**: Developmental perspectives of supervision

A monthly 1.5-hour colloquium provides an ongoing continuing education training program for CAPS staff and interns. Speakers are invited from the professional community. Topics have included: Developing competencies in group psychotherapy; ACT treatment for anxiety and depression; Legal issues in university counseling center settings and assessment of Bipolar Disorder.

Interns participate in clinical, administrative and professional development meetings. All CAPS clinical staff and the interns participate in one of three multidisciplinary clinical teams. They meet for disposition, consultation and discussion of special cases or clinical concerns. Members provide mutual consultation and supervision in assessment, diagnosis, treatment planning and clinical approaches. Staff meetings occur weekly. Interns learn about mental health concerns within the larger university context, agency initiatives and agency policy.
Typical Weekly Schedule*

**Training**
- Supervision of Individual Psychotherapy: 3.00
- Supervision of Career Counseling: 1.00
- Supervision of Group Counseling: 0.50
- Training Seminar: 2.00
- Clinical Team: 1.50
- Professional Development Time: 4.00
  - Session Recording Review: 2.00
  - Research: 2.00
- Monthly Colloquium: .37

**Service Delivery**
- Initial Assessment and Counseling: 13.00
- Career Assessment and Counseling: 2.00
- Group Psychotherapy: 1.50
- Outreach and Developmental Programming: 2.00
- Consultation: 2.00
- Evening Beeper Coverage (Spring/Summer): 2.00

**Agency and Clinical Administration**
- Staff Meeting: 1.50
- Committee/Planning Meetings: 0.50
- Initial Assessments and Clinical Notes: 4.00
- Case Management: 2.00
- Assessment: 1.00

*Time allocations are approximate and vary during peak and non-peak clinical times.*
Evaluation and Feedback

During the training experience, interns participate in formative and summative evaluation processes. Interns receive and provide evaluations during the internship year. Both formative (continuous and ongoing) and summative feedback and evaluation are conducted. Summative evaluation is formalized and evaluates performance against training criteria. Interns participate in a mid-training and end-of-training evaluation process. Permanent clinical staff meet twice (mid-year and end of year) to discuss internship progress. A committee of training staff meets with the intern to review the assessment portfolio. The coordinating is responsible for collating evaluation information from other supervisors and providing feedback.

Interns evaluate supervisors at mid-year and end of year. Additionally, interns provide feedback on the training year at mid-year and end of year.

Clients also provide feedback on their counseling services during the spring and the fall. These results are discussed with the coordinating supervisor.

In keeping with the expectations of the home department, a mid-year and end-of-year progress letter will be sent to the intern’s chairperson or major advisor. This letter will cover all aspects of the training experience.
Intern Rights and Dispute Resolution

CAPS has a comprehensive rights and dispute resolution policy that covers:

- Rights of interns
- Professional competency development
- Procedures for advising and assisting interns who are not performing at the program’s expected level of professional competence
- Dispute resolution guidelines
- Handling concerns and conflicts
- Discrimination and Harassment

These policies and procedures are in compliance with the University Human Resources policies and the policies of the Division of Student Affairs.
Working Hours, Fringe Benefits and Vacation

The work week is forty hours, 8:00 a.m. to 5:00 p.m. or 8:30 a.m. to 5:30 p.m. Occasionally, the intern will be engaged in a weekend workshop or an extended group meeting in the early evening. The intern receives fifteen days of paid vacation. In addition, the University provides ten days of paid holidays. Two days are given for defense of the dissertation (if needed).

All new hires and internal transfers at Duke are subject to a 90-calendar day orientation and probationary period. During this period, interns only accrue vacation, professional leave and sick time. Interns are not eligible to take vacation, sick, professional development or professional conference leave time during this 90-day probationary period. At the conclusion of the orientation and evaluation period, if performance meets expectations, interns will move to regular status as defined by the terms of their appointment.

In light of the cyclical nature of work demands in a university counseling service, the intern is expected to schedule vacation periods at “non-peak demand” times, e.g., winter and spring breaks. Five days of vacation are automatically taken the last week in July. Interns assume primary clinical responsibilities in the agency from mid-May through the end of July. Ten days of sick leave are available and medical health insurance can be obtained. Professional liability insurance is provided.

A travel honorarium of $800.00 is provided each intern. This money can be used to attend the North Carolina Psychological Association’s fall or spring meeting, assist in offsetting the cost of a national or regional convention or pay the registration fees for local workshops and/or seminars. Periodically, additional travel funding may be available.

Stipend

The internship positions are for the academic year August 1, 2017 through July 31, 2018. Each of the three full-time positions carries a stipend of $47,500.
Qualifications of Candidates

Applicants for internship must be degree candidates in APA accredited COUNSELING OR CLINICAL PSYCHOLOGY programs and have a major interest in working with an emerging adult population. Comprehensive exams must be completed by the application deadline. The dissertation or major paper proposal defense must be completed prior to the application deadline.

A minimum of two years of supervised practicum experience prior to the internship is expected with one year of experience in college/university counseling settings highly preferred.

Application Process

In order to apply, please complete the AAPI online application, which may be accessed through www.appic.org by clicking on “AAPI Online”. Supervisors who are directly familiar with your counseling center and clinical practicum experiences should write two of the three letters of reference.

Please send an electronic copy of all materials via the APPIC website. Please note: The internship site will not accept any printed materials.

Should you be appointed as an intern, upon hire, all appointments at Duke University require legal eligibility for employment in the United States. (I-9 certification). A background check confirming that educational records are accurate/valid and that prospective employees have no criminal or other record that would prevent employment at the University is also required.

PLEASE SUBMIT ALL APPLICATION VIA WWW.AAPIC.ORG BY CLICKING ON THE “AAPI ONLINE” LINK.

All application materials should be submitted online. The site will not accept any printed application materials.

The application deadline is Sunday, November 6, 2016 8:00 p.m. EST.

For further information please contact: Anita-Yvonne Bryant, Ph.D., Associate Director for Training Programs, Counseling and Psychological Services, 305 Towerview Road Box 90955, Duke University, Durham, NC 27708-0955. E-mail: ay.bryant@duke.edu
Selection Process

“Is CAPS a good match for my training goals and interests?”

When the selection committee reviews applications, we keep in mind the factors listed below. We include these areas in our application materials to assist you in determining the fit between your training goals and interests and the training opportunities provided by CAPS.

- Professional contributions to the home department, institution, local community or state, regional, national and international professional organizations. Evidence of a commitment to the field of psychology and practice within higher education settings.

- Commitment to cultural and individual diversity in multiple areas of practice (e.g., outreach and developmental programming interventions, clinical areas of interest, scholarship, advocacy). Promotion of equity, reduction of inequity and justice at the individual, micro and macro levels.

- Interest in providing career, group and assessment interventions

- Clinical and outreach and developmental programming intervention work with emerging adults and college students at the undergraduate and graduate/professional levels.

- Exposure to different clinical settings and populations; appreciation for a multidisciplinary work setting; desire to work in multidisciplinary teams

- Interest in working collaboratively and consultatively with colleagues within the Division of Student Affairs and across Academic Affairs offices.

- Commitment to reciprocal learning; growing from the internship experience and contributing unique skills and perspectives to our training site.

Notification

Every effort is made to notify candidates of their interview status by December 15. Given the heavy service demands in November and December, applicants should be aware that they might receive later notice. Applicants not being considered further for the internship will receive an e-mail. Candidates being considered for the internship will receive an e-mail confirmation.
CAPS affirms APA’s position statement, “Preparing Professional Psychologists to Serve a Diverse Public found at:

Interviews

Candidates being considered for the internship complete a 45-minute telephone interview. CAPS is mindful of the cost-prohibitive nature of travel to multiple internship sites for interviews. Consequently, we only conduct telephone interviews.

After the telephone interview, we can also facilitate conversations with other CAPS staff members and psychology interns. These staff members welcome the opportunity to speak with candidates via telephone or email regarding candidate interests and questions about CAPS, Duke University, and living in the Triangle area.

Occasionally, candidates may decide to visit the center and the campus. We are able to accommodate these informal visits as well. Phone conversations and visits after the phone interviews are offered for candidates to gain as much information about CAPS as possible. Please understand that these contacts will not be factored into the formal selection process.

This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept or use any ranking-related information from any intern applicant.

CAPS abides by the uniform notification guidelines of internship offers and acceptances outlined by the Association of Psychology Postdoctoral and Internship Centers (APPIC).

Equal Opportunity Policy

Duke University does not discriminate on the basis of race, color, national or ethnic origin, sexual orientation or preference, sex, age, or handicap in the administration of educational policies, admission policies, financial aid, employment, or any other university program or activity.
