- Science Careers, <http://jobs.sciencereaders.org/jobs/postdoc>
- Journals specific to your field
- Postdoc Jobs, <http://www.postdocjobs.com/jobseekers>
- Indeed, <https://www.indeed.com>
- Society for the Advancement of Biology Education Research, <https://saber-biologyeducationresearch.wikispaces.com>
- Database of academic jobs and postdoc positions in Europe, <http://academicpositions.eu>

Searching for skills, achievements, or products you want to have at the end of your postdoc. You can also search for research topics and techniques of interest. If you find a position this way, you can apply through their online system and send your materials to that faculty member to make sure your application is seen.

A word of caution: many postdoc listings on jobs sites are not actually open for applications. Some institutions require that a postdoc position is posted publicly even if the faculty member has already offered the position to someone. Find sources that you trust to only post opportunities that you can actually apply for.
